Make a request to see history.			

How to use "Try it!":

1. Add your access token in the "Bearer" field.
2. **Customize the endpoint:** Use the "base URL" field above the curl request to adapt it to your upload URL.
 - Replace {upload_server} with the appropriate upload data center provided in the previous call.
 - Replace {...} with the unique upload identifier you've received in "Get an upload URL" (it contains authenticated data). The part you need to paste looks like this: upload?uuid=UUID&seal=SEAL&extra=CHANNEL_ID
3. **Upload the video file:** Click the arrow icon to navigate your local device and select an .mp4 file.
4. Click "Try it!" to send the request and upload your video.
