See the [exhaustive](#) list of possible values and their description.

Form Data

channel

string

required

Defaults to news

Category of the video.

Possible**values:**

animals

auto

creation

fun kids

lifestyle

music

news

people

school

shortfilms

sport

tech

travel tv

iOS SDK - Player runtime parameters

videogames

webcam

[See all video categories.](#)**title** string

Defaults to My new video title

Title of the video.

is_created_f **or_kids**

boolean

Defaults to false

True if this video is "created for kids" (intends to target an audience under the age of 16).

allow_emb **ed**

boolean

True if this video can be embedded outside of Dailymotion.

allowed_in_ **playlists**

boolean

True if this video can be added to playlists

country

string

Limit the result set to this country (declarative).

Example:

us

description

string

Comprehensive description of this video.

Sample

value: This is a sample description for my video. **Min:**

1

Max: 3000

end_time

date-time

End date and time of this live stream.

Sample

value:

1404129540

expiry_date

date-time

Date and time after which this video will be made private.

Beware: if

the video was originally defined as private, setting this value will automatically make it public between its publish_date and expiry_date. This setting only affects the visibility of the video, it will still be available to anyone who knows how to access the video's private URL even after this date.

Omitting

this value while setting a past publish_date never expires the video. Set to null (recommended) or a date after Jan 19th 2038 to reset this parameter.

Note : Only Pro Advanced & Enterprise customers are allowed to manage video availability and expiration dates.

Sample value:

1287507036

expiry_date
_availability
boolean
By default, videos reaching their

expiry_date
e are still
available to
anyone who
knows how
to access
their private
URL. Set this
to `false` to
disable this
behavior.

expiry_date

_deletion

boolean

By default,
videos are
deleted
(after a
grace
period)
when their
expiry_dat
e is
reached. Set
this to
`false` to
disable this
behavior.

Note: Only
Pro
Advanced &
Enterprise
customers
are allowed
to manage
video
availability

and
expiration
dates.

explicit

string

True if this
video is
explicit.

Warning:

It's not
possible to
remove this
flag once
set.

geoblocking array of strings

List of countries where this video is or
isn't accessible. To set geoblocking on
your videos, you have to be a
Dailymotion Pro.

A list of country codes (ISO 3166-1
alpha-2) starting with the `deny` or
`allow` (default) keyword to define if
this is a block or an allowlist.

- E.g.: both `allow, fr, us, it` and `fr,
us, it` will allow this video to be
accessed in France, US and Italy
and deny all other countries.
- On the other hand, `deny, us, fr`
will deny access to this video in
the US and France and allow it
everywhere else.
- An empty list or simply `allow`
(the default) will revert the
behavior to allow from
everywhere.

ADD STRING

+

geoloc array of strings

Geolocation for this video. Result is an array with the longitude and latitude using point notation. Longitude range is from -180.0 (West) to 180.0 (East). Latitude range is from -90.0 (South) to 90.0 (North).

Sample value: -122.40061283112,
37.782112059896
Min: 1 **Max:** 150

ADD STRING

+

hashtags array of strings

List of hashtags attached to this video.

Sample value: # hello, #world
Min: 1 **Max:** 150

ADD STRING

+

languagestring

Language of this video. This value is declarative and corresponds to the user-declared spoken language of the video. Allowed

values are ISO-639-3 alpha-2 and alpha-3 language codes.

Sample
value: en
Min: 1 Max:
150

live_ad_bre
ak_launch
integer
Launches a given number of ad breaks for this live stream.

Sample
value: 1

live_auto_re
cord
boolean
True if this live stream is automatically recorded.

mode
string
Stream mode.
Allowed

values: vod

or live

private

boolean

True if this
video is
private.

publish_dat

e

date-time

Date and
time after
which this
video will be
made
publicly
available.

Beware: If
the video
was
originally
defined as
private,
setting this
value will
automaticall
y make it
public after
the
publish_da
te .

This setting
only affects
the visibility
of the video,

it will still be available to anyone who knows how to access the video's private URL even before this date. Omitting this value while setting a future `expiry_date` immediately publishes the video. Set to `null` (recommended) or a date before Jan 1st 1990 to reset this parameter.

Note: Only verified partners are allowed to manage video availability and expiration dates.

Sample value:
1287507036

publish_dat

e_keep_priv

ate

boolean

Keep this
video private
when its
publicatio
n_date is
reached.

published

boolean

True if this
video is
published
(may still be
waiting for
encoding,
see the
status
field for
more
information).

record_stat

us

string

Current state
of the
recording
process of
this video. *
starting :
Recording
video is
going to

start. *
started :
Recording
video is in
progress. *
stopping :
Recording
video is
going to
stop. *
stopped :

video is
stoppedSam
ple value:
started .

soundtrack
_isrc
string
The
International
Standard
Recording
Code of the
soundtrack
associated
to this video.

Sample
value: FR-
6V8-21-
83311
Min: 1 Max:
150

soundtrack
_popularity
integer

Soundtrack popularity.

Sample

value: 100

Min: 0

start_time

date-time

Start date and time of this live stream.

Sample

value:

1287507036

stream_alte

red_with_ai

boolean

Whether the video stream has been altered by AI.

tags array of strings

List of tags attached to this video.

Sample value: party john doe

Min: 1 Max: 150

ADD STRING

thumbnail_

url

string

URL of this video's raw thumbnail (full size respecting ratio). Some users have the permission to change this value by providing an URL to a custom thumbnail. If you don't have the permission, the thumbnail won't be updated.

Note: for live streams, the thumbnail is automatically generated every 5 mn by default; it is not possible anymore to manually refresh the preview.

Maximum allowed file size is 10MB.

Sample

value:

`https://s2.dmcn.net/CTrg1.jpg`

url string

URL of this video on Dailymotion.

Writing this parameter defines where to download the video source. You may either use this parameter at video creation time or change this parameter later if you want to change this video source afterward.

To change an existing video, the authenticate d user may need some additional permissions.

You may use the `GET /file/upload` API resource to upload a video file and create a URL to provide to this method or use an existing URL pointing to your own video file.

Writing to this parameter is subject to rate limiting.

Sample value:

`https://www.dailymotion.com/video/x26m1j4`
